OFFLINE MODE

- 1 All active promo campaigns are visible off-line.

SETTINGS

- 1** Change Language and Location: Change this only if really required as all information may appear different. Apart from the change in language, different products are available in different countries. It is advised to change the default language settings of your phone to match this setting, otherwise the locate store feature may not work correctly. A best way to ensure that the default language setting matches the language chosen in the app, is by checking the location name displayed on the dashboard.
- 2** How to use the app: This help manual is found under this.
- 3** FAQ : Get answers to the most frequent problems that users face
- 4** About App: Version details with date of its release is available here.
- 5** Feedback: Any feedback or suggestions regarding the app are welcome here. Also, if you would like to volunteer for us, you can contact us here, and we will guide you on how you can contribute and profit at the same time.
- 6** All these features except changing language and location are available in offline mode.
